

## Mobile Scrubbing Units

REYM is an industrial service provider. We support our customers in the field of industrial cleaning, transport and waste management, always acting from our mission 'Industrial Services our concern' and driven by our core values. For our degassing projects we use REYM-HMVT Degassing Services.

Some vapors released during industrial cleaning operations cannot simply be released into the atmosphere. REYM-HMVT has a wide range of flexible, mobile treatment plants to effectively clean these vapors. Vapor cleaning is an integral part of the cleaning process and maintenance work.

In addition to vapour condensation, (catalytic) oxidation and the use of activated carbon filtration, Reym-HMVT also uses Scrubbing Units.

REYM-HMVT has developed a Mobile Scrubbing Unit especially for its degassing projects, which can be easily transported, set up on site quickly and can be put into operation immediately. This Mobile Scrubbing Unit can wash out a wide range of contaminated vapour flows, using different types of washing fluids.

### Main Specifications:

- The maximum air flow rate to be treated is 2,500 m<sup>3</sup>/hour.
- Integrated tank pre-wash liquids, with cooling option
- Dimensions: length x width: 7250 mm × 2500mm
- Explosion proof
- Fully self-contained
- Equipped with PLC control and telemetry system, including data logging.

In addition to this Mobile Scrubbing Unit with innovative wash tanks and a capacity of up to 2,500m<sup>3</sup>/hour, REYM-HMVT has a wide range of other Scrubbing Units, increasing up to a capacity of up to 10,000m<sup>3</sup>/hour.

If you would like more information, please contact one of the REYM-HMVT branches in your region.
