

Offshore tanks

REYM is an industrial service provider. We support our customers in the field of industrial cleaning, transport and waste management, always acting from our mission 'Industrial Services our concern' and driven by our core values.

REYM has twelve T14 classified tanks with top inlet and discharge option. They can be used for specialist cleaning assignments, offshore as well as onshore.

These specially designed portable tanks meet all conditions set for the transport of dangerous goods on sea and over the road. They are T14 classified and suitable for the storage and transport of chemicals and hazardous materials, including NORM (radioactive) pollution.

The tanks have optimal facilities to guarantee safe working at height. Specialistic vacuum activities have been taken into account in the configuration of the tanks.

Specifications

- Offshore portable tank, approved according to the ADR / RID / IMDG-T14 requirements
- Designed, manufactured and fully certified according to DNVGL-ST-E271 / ISO 10855
- 4,800 liter capacity
- Payload 6800 kg, Tare 3200 kg, MGW 10000 kg
- Working pressure -0.9 bar to 4 bar
- Stainless steel tank body with innovative surface treatment
- Due to the top inlet and discharge options, the tank is suitable for transporting radioactive waste without ADR exemption
- Suitable for use between -40 °C and 70 °C
